

What would happen if your home was destroyed in a fire or by a tornado? Would you remember everything you had in your home?

For a great way to create a home inventory, go to <http://www.KnowYourStuff.org> then click to download the Home Inventory software. This user-friendly software makes creating a home inventory fun and easy! Know Your Stuff helps customers enter items by room and upload photos or scanned receipts. Once the information is in the system, items can be sorted by price, date of purchase or type (silverware, major appliances, etc.). Customers can even customize their own categories. Once you have completed your home inventory, the Know Your Stuff report also can be printed, saved on a computer, e-mailed or burned on a CD. With Know Your Stuff Home Inventory, it is also very easy to keep your information up to date. Don't wait until it is too late!
